

How We Can Help?

COVID-19: Preparation & Response

COVID-19 has created an unprecedented shift in how organizations deliver their mission critical functions.

With the advent of remote work capabilities, business communication channels are adapting to the needs of mobile workforces and attempting to deliver operationally resilient technology to ensure continuity.

Threat actors are taking advantage of COVID-19 as a vector for deploying malware & ransomware, performing targeted spear-phishing attacks, and using social media derived panic as a facilitator for social engineering attacks.

Vartai has continued to support our clients throughout the pandemic. We are dedicated to providing relevant and necessary services to protect your Cyber Gate.

MITIGATIONS
